Production Unit Confirmation

DATE	08/13/26

To Twelve South,

We hereby confirm that the production version of the **AirFly Drive (CA525)** is technically equivalent to the configuration covered by the existing compliance documentation, including:

RED	CE (EMC)	RoHS	REACH
Supporting test reports and technical documentation			

We further confirm that:

1. The production units use the same hardware architecture, wireless module, PCB design, power specifications, and critical components as the certified configuration.
2. No compliance-related design changes have been introduced that would affect the applicability or validity of the above certifications or supporting documentation.
3. The dedicated CA525 certification documents currently being processed are intended only to provide product-specific documentation. They do not indicate any compliance issue with the current production units.
4. Based on the existing compliance documentation, there are no known compliance-related issues that would prevent shipment of the AirFly Drive (CA525) to the market.

If further information is required, please feel free to contact us.

Kind regards,

COMPANY SEAL
