

DECLARATION OF CONFORMITY

Product Safety

At Lexon, the safety and reliability of our products are at the heart of our priorities. We are committed to offering innovative, stylish, and functional products while ensuring they comply with the most stringent safety standards. This declaration details the principles, processes, and measures we adopt to ensure the safety of our products.

Compliance with International Standards

All Lexon products, whether connected devices, lamps, radios, office, or travel accessories, are designed to comply with applicable international regulations and standards.

These standards include, but are not limited to:

- **CE directive** for products sold in Europe.
- **RoHS** (Restriction of Hazardous Substances) and **REACH** (Registration, Evaluation, Authorization, and Restriction of Chemicals) for chemical substance control in materials.
- **ISO standards** to ensure compliant and safe production processes.

Manufacturer Obligations

In accordance with the new European Regulation (EU) 2023/988 on general product safety, Lexon applies the following obligations:

- 1. Technical Documentation:** We prepare technical documentation for each product, containing the necessary information to demonstrate that our products are safe. This documentation includes test reports, certifications, and risk analyses.
- 2. Risk Analysis:** Each product undergoes a thorough analysis to identify potential risks to user health and safety, as well as the measures adopted to mitigate these risks.
- 3. Instruction Compliance:** Products are accompanied by clear instructions regarding installation, use, and maintenance to prevent improper use that could endanger users.
- 4. Identification and Traceability:** All our products are clearly identified with unique markings allowing traceability, which facilitates the management of recalls in case of identified defects.

Safe and Sustainable Materials

We exclusively use high-quality materials carefully selected for their safety, durability, and environmental friendliness. All components of our products, from electronic circuits to plastic or metal casings, undergo rigorous testing to ensure they pose no danger to users.

Lexon is committed to minimizing the environmental impact of its products without compromising safety. We promote eco-design by favoring the use of recyclable materials and reducing the energy consumption of our devices.

Rigorous Testing Processes

Before being marketed, all our products undergo a series of exhaustive tests to evaluate their compliance, durability, and safety. These tests include:

- 1. Electrical and Electronic Tests:** To avoid risks of overheating, short circuits, or malfunctions.
- 2. Mechanical Tests:** To ensure the strength of components and their resistance to daily wear and tear.
- 3. Chemical Tests:** To verify the absence of harmful substances in accordance with RoHS and REACH regulations.
- 4. Environmental Tests:** To evaluate product performance in various climatic or usage conditions.

Ergonomic and Safe Design

Our products are designed to provide intuitive and secure usage. We consider the needs of all users by integrating ergonomic features that minimize risks of accidents or misuse. For example, electronic products include systems to protect against surges and overloads.

Ongoing Commitment

The safety of Lexon products is a responsibility we take very seriously. We are committed to continuously improving our processes and standards to ensure that every product bearing the Lexon name represents quality, reliability, and safety for our customers worldwide.
