- **5.** The **Lite app** will connect to your selected product.
- **6.** If the connection fails, please try to connect again or flick the switch on and off three times.

Step 4

Step 5

Step 6

If unable to connect visit the Support page on **litebulbmoments.com**

Control devices

After successfully installing your bulbs, they will be shown on the home page. Tap to enter the control page.

When the device is online, it supports all short-cut operations. Select the product you want to control.

Under the menu tap **Smart**, you can set up scenes and routines.

Scenes: here you can program different scenes in your house. It can be one bulb or a bundle of bulbs of your house e.g. one bulb in the hallway and one in the living room.

Routines: You can set up your scenes after a number of different routines e.g. time of the day, the weather or the bulb status.

Please visit our website for regular updates and exemplification on scenes and routines.
