

Safety Sheet - Laptop Sleeve

The sleeve is designed to hold a laptop. Do not overload with other heavy items to avoid damage to the PC and the sleeve itself. Clean with a damp cloth and a neutral detergent. Avoid immersion in water and the use of harsh detergents that could damage the materials. The sleeve is equipped with an Anti-Slip System® inside that prevents the device from slipping out even when the zippers are open. Always close all zippers to protect the PC from dust and moisture. The sleeve offers protection from scratches and minor impacts; avoid throwing it to the ground or subjecting it to strong impacts. Store in a dry place to avoid exposure to moisture that could damage both the sleeve and the device inside. Do not fold the sleeve: it is not designed to be folded. Folding the product can cause permanent creases that compromise the integrity of the material and prints. Make sure the PC is positioned correctly inside the sleeve, that the anti-slip system is used, and that the zippers are closed to prevent accidental dropping of the device during transport. Always carry with caution to ensure the protection of the device inside. Protect the sleeve from rain and prolonged exposure to the sun to maintain the integrity of the materials. The materials of this sleeve comply with REACH (Regulation (EC) No. 1907/2006), ensuring compliance with EU safety standards. This product is covered by a two-year warranty. On the packaging, you can find the disposal instructions specific to it by scanning the designated QR code. In case of questions or needs, contact customer service at 02252010.
